PERSONAL PROFILE

I'm 2 years experienced React developer with hands-on expertise in identifying web-based user interactions along with implementing highly-responsive user interface components by deploying React concepts. I'm proficient in translating designs and wireframes into high-quality code and writing application interface code via Javascript and ReactJS workflows.

https://www.linkedin.com/in/emremutlu8/

QUALIFICATIONS

Creating web applications [1]
Maintaining, optimizing, troubleshooting, and improving websites [2]
Implementation of apps and landing pages from concept through deployment [3]

Github: https://github.com/emremutlu08?tab=repositories

Skillset:
- React | Redux | NextJS
- NodeJS | ExpressJS
- HTML5 | CSS3 | SCSS | Bootstrap | TailwindCSS | Styled Components | Material-UI (MUI) | PrimeReact
- MongoDB | Firebase
- Jira | Scrum
- i18Next
- OpenLayers

I've used these tools/technologies while working on my projects:
Git, Github, ESLint, Prettier, Yarn, Npm, and much more

WORK EXPERIENCE

GEOSYS GIS & Consultancy Services   Oct 2021 — Present
Frontend Developer

Key Qualifications & Responsibilities

- Implementing 150+ web pages by following "Figma Design" and "User Stories."

- Creating reusable React components

- Led troubleshooting, fixed 1,000+ bugs and other issues

- Identified and implemented dynamic web solutions according to company standards

and best practices.

- Worked in an Agile, collaborative environment to receive design requirements and

test applications

- Optimize applications for maximum speed

Collaborate with back-end developers and web designers to improve the usability

- Building reusable code for future use

Projects Features

- Authorization and Authentication

- Process Tracking and Management

- Using Map Features (OpenLayers)

- Reporting (Exporting PDF, CSV, and more)

- Tables

- Real-Time Communication and Notification (WebSockets)

- Viewing Documents (PDF)

Skills: Front-End Development · Redux.js · npm · Yarn · Scrum · Web Applications · User Stories · REST APIs · Representational State Transfer (REST) · Programming · Jira · Software Development

----

Digigammon   2021 — Oct 2021

Full Stack Developer

Key Qualifications & Responsibilities

- Developing both Frontend and Backend of the application by using MERN Stack
- Creating Apis that are serving the client-side of the app
- Creating backend services that communicate with the ML side of the project and complete the close-loop* of the system.
- Build an interactive, single-page React app that could scale with increases in interaction complexity and volume.
- Follow the AdobeXD design and ML team's needs.

* Close-loop

- User uploads the backgammon match video to the system via using the Digigammon.com website
- Backend service calls the ML app to process the video files
- Backend service listens to the ML app
- When the video transcript is ready, the backend service send an email to the user to notify them to get their backgammon match's transcript

PROJECTS

SebAtlas - Serbest Bölgeler Atlası (https://sebatlas.gov.tr/)

Projects Features

- Authorization and Authentication (React)

- Process Tracking and Management (React)

- Using Map Features (OpenLayers)

- Reporting (Exporting PDF, CSV, and more) (Javascript)

- Tables & File Upload (PrimeReact)

- Real-Time Communication and Notification (WebSockets)

- Viewing Documents (PDF)

Digigammon (https://digigammon.com/)

Projects Features

- Authorization and Authentication (React & Node.js)

- Process Tracking and Management (React & Node.js)

- Email Notifications (nodemailer)

- Drawing Shapes (React Moveable)

- Tables (React)

Project Showroom (https://project-showroom.vercel.app/)

Projects Features

-CRUD operations (Next.js)

-React Components (MUI)
